## Unique, exclusive, authentic: Ferrari Genuine options and accessories.

---

When you join the Ferrari world, you know that every single day will be a special experience, with excellence evident in the meticulous attention dedicated to even the tiniest detail. The comprehensive choice of options and original accessories offered to let owners personalize the interior and exterior of their Ferraris reflects the same exacting quality standards that have always defined the cars from Maranello. This dedication to excellence is put into practice in the continuous research for lighter, higher performance materials such as titanium and Alutex, in the implementation of avant-garde technology and in the creation of new styling solutions either inspired by the traditions of the Prancing Horse, or shaped by a more aggressive, modern and innovative design.

With an extensive choice of products conceived to emphasize the uniqueness and exclusiveness of each individual Ferrari, Ferrari Genuine offers owners the opportunity to enhance the technical, styling and aerodynamic attributes of their cars to suit their own personal preferences and tastes.

## Datarace

The Datarace system lets owners improve their performance on the track by recording video footage of each session with embedded performance analysis data: acceleration, circuit map, lap time and GPS acquired position. The CAN version also includes a dashboard unit displaying lap times and functioning as a data-logger, acquiring information directly from the vehicle ECU.

## Track cameras

The track cameras are an optional accessory orderable in addition to the telemetry kit. When installed in the passenger compartment, and positioned to film both the circuit and the driver zone, these cameras let drivers record their driving experience and review their performance afterwards in high definition video and analyze driving line, braking points and driving technique. Compatible with the Ferrari Telemetry App for data analysis.

## Telemetry kit

The Ferrari Telemetry Kit – which is integrated in the multimedia system – monitors the position of the vehicle and analyses and records performance data for each track session. The key parameters recorded may then be viewed directly on the dashboard or on an iPad device or PC. The telemetry parameters available are: speed, braking, gear selected, acceleration and lap time. The session performance data may be analyzed in even more detail with the exclusive specific application: Ferrari Telemetry App.

## Forged multi-spoke wheels

The forged multi-spoke wheels - offered as Diamond polished, Dark Gray and Silver variants – are manufactured with special production technology which maximizes the technical characteristics of aluminum and significantly reduces the weight of the wheel, while significantly increasing stiffness to offer a perceptible improvement in the handling of the car. Further contributing to the ultra-light weight of these wheels is the multi-spoke design. The design is the latest and most modern iteration of the concept introduced with the Scuderia wheel and evolved in the forged multi-spoke wheels of the FF and 458 Italia. Fitting forged wheels reduces the weight of the car by 15 Kg.

## Standard wheels

The standard wheels of the F12berlinetta play a key role in completing the design of the model, combining classic Ferrari style with state of the art technology. The range of colors offered has been specifically selected to cater to every possible taste and style: Corsa Gray, Dark Gray and Silver.

## 5-spoke forged wheels

The Ferrari 5-spoke forged wheels offer superlative mechanical stiffness with an elegant, slim design, and are specifically conceived to contribute to reducing the overall weight of the car. Three color variants are offered, which accentuate the exclusive style of the F12berlinetta: Matte Black, Titanio Gray and Diamond Polished Titanio Gray. Fitting forged wheels reduces the weight of the car by 15 Kg.

## Exterior personalization options in carbon

The carbon fiber personalization details available for the exterior of the F12berlinetta complement the looks of the car and contribute to maximizing performance, minimizing the weight of each individual component by using carbon: an ultra-light, technologically advanced

material with an unmistakable texture, which adds to the already exclusive feel of the car.

Carbon fiber variants of the rear fog lamp bezel, side skirts, aerobridge, headlamp elements, fuel filler flap,

rear diffuser and spoiler, door handles and engine compartment trim are all available as accessories to personalize the exterior of your car with complete flexibility, designed and crafted to the same exacting standards applied in Formula 1.

## Grille with chrome accents

Alongside the classic standard grille in black, a front grille with chrome accents is now available for the F12berlinetta. The special chrome finish lets owners personalize their car to suit their own taste, enhancing both the value and the exclusiveness of their Ferrari.

## Interior personalization options in carbon

The range of carbon fiber personalization options available for the interior of the F12berlinetta offers a comprehensive selection of ultralight, elegant and functional accessories designed with the utmost attention to detail and developed and manufactured with advanced, proprietary technologies.

Carbon fiber variants of the F1 shift paddles, kick plate, dashboard inserts, inner door panels, luggage retainer lip, bridge, tunnel and mats are all available as accessories to personalize the interior of your Ferrari with details that complement the original style of the car and offer the same impeccable ergonomics and comfort for the driver and passengers.

## Front and rear parking cameras

The front and rear parking cameras help the driver identify obstacles when parking, and facilitates maneuvering. The system uses audible warnings and visual signals to help the driver avoid contact with objects that may have been concealed from view.

## Tire pressure monitoring

Using sensors installed within the wheels, the tire pressure monitoring system measures tire pressure continuously and sends this information to the ECU, which relays the information to the instrument cluster and warns the driver of any problems in real time.

## Front suspension lift

The “Lift” system maximizes driver safety and facilitates access to garages and/or ramps, avoiding possible damage to the car. The system is operated simply and efficiently on the front shock absorbers, lifting the front of the car by around 40 mm. Two versions of the system are available, depending on whether or not the car in question is equipped with a dual-view video camera.

## Cruise Control

Cruise Control is an electronic system which maintains a constant road speed without the driver using the accelerator pedal. The driver may accelerate briefly if necessary by pressing the accelerator pedal, but once the pedal is released, the vehicle returns to the cruise control speed set previously. The system functions within a speed range from 30 to 200 Km/h, and is recommended for long, straight stretches of road, with few variations in traffic conditions and with a dry road surface. Not recommended for use on urban roads.

## Passenger display

This display installed on the passenger side of the dashboard offers an interface which involves passengers in the Ferrari driving experience by letting them view technical information directly for themselves. The parameters and functions viewable are: engine speed, speed, gear selected, Manettino setting, repeated navigation information and symbols, and trip computer functions.

## CD Reader

Customers may request an additional CD reader installed in the car. The CD reader is situated behind the seats in the center of the rear bench, and may be used to play audio and MP3 format CDs. This option is not compatible with vehicles with carbon fiber luggage retainer lip.

## AFS headlights

The AFS – Adaptive Frontlight System – headlights ensure maximum safety and performance even when driving at night by directing the light beam according to the steering angle and optimizing the intensity of the beam itself in relation to vehicle speed, even when driving around corners. The transition from diffused light illuminating nearby objects to a penetrating focused beam for long distance vision is smooth and seamless.

## Electro-chromic mirrors

The electrochromic mirrors effectively reduce reflected glare for the driver. This mirror uses special electrochromic technology to darken quickly and automatically in response to the brightness of the light striking it. Electrochromic versions are available for both the interior and exterior rear view mirrors, and does not affect the mirror position memory and powered folding mirror functions on vehicles with these features.

## Privacy glass kit

Ferrari Genuine offers its customers a privacy glass kit for the rear screen and rear side windows. The tinted glass protects the rear of the vehicle interior from prying eyes, and also contributes to keeping the passenger compartment cooler. The specially defined tint color of the kit reduces the amount of sunlight reaching the interior of the car, preventing it from becoming uncomfortably hot.

## Anti-stone chip protective film

To protect the bodywork from marks, chips and scratches caused by gravel picked up from the road, a kit may be ordered consisting of extremely tough and thin transparent protective films tailored specifically for the forms of the car. Films applied to particularly exposed areas such as the wheel arches and air intakes, and subject to greater wear, may also be ordered individually.

**FF**

**GENUINE  
Ferrari**

## Forged Multi-Spoke Wheels

The set of 20" forged multi-spoke wheels for the FF feature a 5 split-spoke design which gives the car an even more dynamic look. Conceived to accentuate the technological content and design of the car, these ultra-light wheels are available in a choice of 3 different finishes: Silver, Dark Gray and Diamond Polished. Fitting forged wheels reduces the weight of the car by 10 Kg.

## Standard wheels

The range of 5 spoke wheels available is offered in a choice of different finishes - Silver, Silver/ Diamond Polished, Dark Gray/Diamond Polished Gray - to let owners express their own personality and choose to accentuate the style of the car in a classic or contemporary key style in accordance with their own preferences.

## Exterior personalization options in carbon

---

The carbon fiber personalization details available for the exterior of the FF complement the looks of the car and minimize the weight of each individual component by using carbon: an ultra-light, technologically advanced material with an unmistakable texture, which adds to the already exclusive feel of the car.

Carbon fiber variants of the fuel filler flap and door handles are available as accessories to let you personalize the exterior of your car with complete flexibility.

## Chromed grille and grille with chrome accents

---

Alongside the classic standard grille in black, a choice of exclusive finish variants is offered for the front grille of the FF, to let customers personalize their vehicles further to suit their own tastes. Customers can also choose a completely chromed front grille, or a front grille with an exclusive chrome finish applied only to the outer edges of the vertical and horizontal bars.

## Sports tailpipe tips

---

Tailpipes enhanced visually with an extremely modern forged, segmented outer bezel and designed specifically to maintain the purity of the unmistakable sound of each individual Ferrari model.

## Interior personalization options in carbon

The range of carbon fiber personalization options available for the interior of the FF offers a comprehensive selection of ultralight, elegant and functional accessories designed with the utmost attention to detail and developed and manufactured with advanced, proprietary technologies.

Carbon fiber variants of the F1 shift paddles, kick plate, dashboard inserts, console kit, center trim insert and mats are all available as accessories to personalize the interior of your Ferrari with details that complement the original style of the car and offer the same impeccable ergonomics and comfort for the driver and passengers.

## Interior personalization options in Alutex

With the Alutex interior trim kit, Ferrari Genuine offers owners even more scope to personalize their cars. Alutex is a special woven texture finish applied to the outer layer of the composite material. The outermost layer is coated with aluminum, which gives any components made with this technology an unmistakable and unique look.

### Front suspension lift

The "Lift" system maximizes driver safety and facilitates access to garages and/or ramps, avoiding possible damage to the car. The system is operated simply and efficiently on the front shock absorbers, lifting the front of the car by around 40 mm. Two versions of the system are available, depending on whether or not the car in question is equipped with a dual-view video camera.

### Tire pressure monitoring

Using sensors installed within the wheels, the tire pressure monitoring system measures tire pressure continuously and sends this information to the ECU, which relays the information to the instrument cluster and warns the driver of any problems in real time.

### Parking sensors and parking camera

The parking camera helps the driver identify obstacles when parking, and facilitates maneuvering. The front parking sensors developed by Ferrari provide the driver with information on the distance of obstacles in front of the vehicle when maneuvering. This allows the driver to avoid any contact while maneuvering, by combining direct visual information with the acoustic and visual information generated by the system itself.

## Infotainment System

The 2 DIN infotainment system developed for the FF uses state of the art integrated technology capable of dialoging with Android™ and Apple® devices for unrivaled user friendliness and driver safety: all your apps (from weather and news services to web radio and social network apps) are easily accessible via the Smart Access platform, as versions optimized for use in a car. The system's 6.2" touch screen is as intuitive to use as a smart phone, while Bluetooth® connectivity makes it possible to listen to music and make calls while never taking your hands off the wheel. The Intelligent VOICE (TM) technology of the navigation system lets the user search with natural speech, even with only partial or imprecise instructions.

Ferrari Genuine also offers a high technology integrated entertainment system for the rear passengers, giving them access to an even more involving Ferrari experience without interfering with the main infotainment system of the car. With the Rear Seat Entertainment system with iPad, up to two tablets may be installed in the backs of the front headrests, complete with coordinated Bluetooth headsets for watching movies, plays games or browse the web. The CD changer, compatible with any Ferrari audio configuration, is housed in a special shock-proof compartment inside the luggage compartment. This product option is even compatible with the suitcase set for the luggage compartment.

## Audio Upgrade

The Audio Upgrade is a high tech solution which equips the car with two amplifiers - one for the front and one for the rear - to offer a high quality, individually tailorable listening experience in separate zones of the cabin, with five completely customizable equalizer settings.

## Satellite navigation system

The original Ferrari navigation system memories all route information to optimize journey time and fuel consumption. Map updates come complete with thousands of points of interest and special itineraries specifically selected for Ferrari owners, including hotels, restaurants, theaters, museums, golf courses and much more. The system may also be fitted as an aftersales accessory, replacing the NIT and installing the GPS antenna.

## Cruise Control

Cruise Control is an electronic system which maintains a constant road speed without the driver using the accelerator pedal. The driver may accelerate briefly if necessary by pressing the accelerator pedal, but once the pedal is released, the vehicle returns to the cruise control speed set previously. The system functions within a speed range from 30 to 200 Km/h, and is recommended for long, straight stretches of road, with few variations in traffic conditions and with a dry road surface. Not recommended for use on urban roads.

## Passenger display

This display installed on the passenger side of the dashboard offers an interface which involves passengers in the Ferrari driving experience by letting them view technical information directly for themselves. The parameters and functions viewable are: engine speed, speed, gear selected, Manettino setting, repeated navigation information and symbols, and trip computer functions.

## Electro-chromic mirrors

The electrochromic mirrors effectively reduce reflected glare for the driver. This mirror uses special electrochromic technology to darken quickly and automatically in response to the brightness of the light striking it. Electrochromic versions are available for both the interior and exterior rear view mirrors, and does not affect the mirror position memory and powered folding mirror functions on vehicles with these features.

## Privacy glass kit

Ferrari Genuine offers its customers a privacy glass kit for the rear and side windows. The tinted glass protects the rear of the vehicle interior from prying eyes, and also contributes to keeping the passenger compartment cooler. The specially defined tint color of the kit reduces the amount of sunlight reaching the interior of the car, preventing it from becoming uncomfortably hot.

## Anti-stone chip protective film

To protect the bodywork from marks, chips and scratches caused by gravel picked up from the road, a kit may be ordered consisting of extremely tough and thin transparent protective films tailored specifically for the forms of the car. Films applied to particularly exposed areas such as the wheel arches and air intakes, and subject to greater wear, may also be ordered individually.

## Datarace

The Datarace system lets owners improve their performance on the track by recording video footage of each session with embedded performance analysis data: acceleration, circuit map, lap time and GPS acquired position. The CAN version also includes a dashboard unit displaying lap times and functioning as a data-logger, acquiring information directly from the vehicle ECU.

## Luggage retainer net

---

Ferrari Genuine offers a special luggage retainer net with a polypropylene coating and a flexible core, which retracts to a mesh size of approximately 20 mm when not in use. Created to retain objects carried in cabin or luggage compartment safely, the net optimizes space use and prevents noise caused by loose items, keeping everything tidy and within easy reach when you need it.

## Smoker's kit

---

The smoker's kit adds an ashtray and a cigarette lighter installed in the front center tunnel console. The components of the kit are specifically designed to complement the exclusive style of the interior of a Ferrari.

## Indoor car cover

---

Elegant car cover for indoor use and tailor-made for Ferraris, it combines effective protection with elegant looks. The cover has an inner anti-scratch lining, which ensures optimal protection when placed upon the vehicle's body: and is also enhanced by the Prancing Horse emblem embroidered on the areas protecting the lids.

***LaFerrari***

## FXX-K style multi-spoke wheel rims

---

The FXX-K style wheel rims have technological innovations that accept no compromises and guarantee a unique driving experience. An item that has been specifically developed by Ferrari Genuine, the multi-spoke wheel rim combines minimal design with forged aluminium technology: this results in a very low weight that is comparable with magnesium wheel rims but stronger.

## Carbon fibre mats

Using new patented technology, Ferrari Genuine mats are made of real carbon fibre where the driver's feet rest and covered with a special clear-coat finish that offers anti-slip action without altering its appearance. The vehicle logo is on the driver side mat only and is laser engraved on a leather patch. The backing is in genuine leather which ensures superior flexibility and resilience and offers a high quality feel. The mats are edged in leather, with exquisite stitching in different tones of grey.

## Carbon fibre shield kit

Ferrari Genuine has dedicated a unique accessory to Ferrari owners: the carbon fibre fender shield kit with Prancing Horse. The dark carbon fibre background together with its aggressive look accentuates the shiny chrome of the Prancing Horse and creates an extremely elegant effect.

## Exterior personalization options in carbon

The carbon fibre options for the LaFerrari exterior help to give the vehicle a unique appearance and enhance the excellence of the other carbon fibre features.

The active rear extractor kit, fuel filler flap, battery charging flap and spoiler at the centre of the front lid are Genuine accessories that personalise the vehicle exterior and make it special in line with high technical standards based on Ferrari's experience in Formula 1.

**488 GTB**

**GENUINE  
Ferrari**

**488  
SPIDER**

## Exterior personalization options in carbon

The carbon fiber personalization details available for the exterior of the 488 GTB and 488 Spider complement the looks of the car and minimize the weight of each individual component by using carbon: an ultra-light, technologically advanced material with an unmistakable texture, which adds to the already exclusive feel of the car.

Carbon fiber variants of the rear diffuser, rear fog light bezel, spoiler, sill trim, splitter, lateral air intakes and rear air ducts are all available as accessories to let you personalize the exterior of your car with complete flexibility, designed and crafted to the same exacting standards applied in Formula 1.

## Multi-spoke wheels

Ferrari Genuine continues to develop wheels with an exclusive design, and now offers specific components for the new 488 GTB and 488 Spider. Multi-spoke wheels are a high-tech solution with a distinctive look: the forging process makes it possible to make a much lighter wheel, while the new multi-spoke design - a natural evolution of the wheels of the 458 Speciale - features boldly three dimensional forms and soft lines, which accentuate the elegance of the car. These wheels are offered in a choice of two trim variants: Matte Grey and Matte Diamond Polished.

## Interior personalization options in carbon

The range of carbon fiber personalization options available for the interior of the 488 GTB and 488 Spider offers a comprehensive selection of ultralight, elegant and functional accessories designed with the utmost attention to detail and developed and manufactured with advanced, proprietary technologies.

Carbon fiber variants of the dashboard inserts, center tunnel console, bridge, door panels, kick plate and mats are all available as accessories to personalize the interior of your Ferrari with details that complement the original style of the car and offer the same impeccable ergonomics and comfort for the driver and passengers.

## Parking sensors and parking camera

The parking camera identifies obstacles when parking, and assists the driver with any maneuvers. The front parking sensors developed by Ferrari provide the driver with information on the distance of obstacles in front of the vehicle when maneuvering. This allows the driver to avoid any contact while maneuvering, by combining direct visual information with the acoustic and visual information generated by the system itself.

## Passenger display

This display installed on the passenger side of the dashboard offers an interface which involves passengers in the Ferrari driving experience by letting them view technical information directly for themselves. The parameters and functions viewable are: engine speed, speed, gear selected, Manettino setting, repeated navigation information and symbols, and trip computer functions.

## Front suspension lift

---

The “Lift” system maximizes driver safety and facilitates access to garages and/or ramps, avoiding possible damage to the car. The system is operated simply and efficiently on the front shock absorbers, lifting the front of the car by around 40 mm. Two versions of the system are available, depending on whether or not the car in question is equipped with a dual-view video camera.

## Anti-stone chip protective film

---

To protect the bodywork from marks, chips and scratches caused by gravel picked up from the road, a kit may be ordered consisting of extremely tough and thin transparent protective films tailored specifically for the forms of the car. Films applied to particularly exposed areas such as the wheel arches and air intakes, and subject to greater wear, may also be ordered individually.

## Indoor car cover

---

Elegant car cover for indoor use and tailor-made for Ferraris, it combines effective protection with elegant looks. The cover has an inner anti-scratch lining, which ensures optimal protection when placed upon the vehicle’s body: and is also enhanced by the Prancing Horse emblem embroidered on the areas protecting the lids.

## Electro-chromic mirrors

---

The electrochromic mirrors effectively reduce reflected glare for the driver. This mirror uses special electrochromic technology to darken quickly and automatically in response to the brightness of the light striking it. Electrochromic versions are available for both the interior and exterior rear view mirrors, and does not affect the mirror position memory and powered folding mirror functions on vehicles with these features.

488 GTB 488 SPIDER

Ferrari  
*California T*

## 19" painted wheels for the CaliforniaT

These 19" paint finish, five spoke wheels are designed specifically for the Ferrari CaliforniaT. As an alternative to the standard color, these wheels are also available in Brilliant Silver and Matte Corsa Gray finishes.

## 20" forged wheels for the CaliforniaT

These 20" five spoke forged wheels reduce the weight of the car as a whole for even more direct steering feel. Available in Silver, Matte Corsa Grey and Diamond Polished finishes. Fitting forged wheels reduces the weight of the car by 6 Kg.

## Carbon fiber fuel filler flap

The materials used for Ferrari accessories adopt state of the art technological solutions derived directly from Formula 1. The light and functional fuel filler flap in carbon fiber, embellished with a chrome finish Prancing Horse motif, is the perfect complement to the style of the CaliforniaT.

## Chromed grille and grille with chrome accents

Alongside the standard grille in black, a choice of exclusive finish variants is offered for the front grille of the Ferrari CaliforniaT, to let customers personalize their vehicles further to suit their own tastes. Customers can also choose a completely chromed front grille, or a front grille with an exclusive chrome finish applied only to the outer edges of the vertical and horizontal bars.

## Sports tailpipe tips

Tailpipes enhanced visually with an extremely modern forged, segmented outer bezel and designed specifically to maintain the purity of the unmistakable sound of each individual Ferrari model.

## Road legal mufflers

The road legal mufflers offered for the Ferrari CaliforniaT have an optimized configuration with a smaller internal volume conceived to maximize the distinctive Ferrari sound even when driving on public roads. Fully certified and conforming to road traffic regulations, these components are integrated entirely within the existing exhaust system, and feature a unique configuration developed, tested and guaranteed by Ferrari.

## Interior personalization options in carbon

The range of carbon fiber personalization options available for the interior of the CaliforniaT offers a comprehensive selection of ultralight, elegant and functional accessories designed with the utmost attention to detail and developed and manufactured with advanced, proprietary technologies.

Carbon fiber variants of the F1 shift paddles, dashboard inserts, kick plate, bridge and mats are all available as accessories to personalize the interior of your Ferrari with details that complement the original style of the car and offer the same impeccable ergonomics and comfort for the driver and passengers.

## Parking camera

The parking camera lets the driver see obstacles in the vicinity of the car to prevent accidental collisions. The camera system works in conjunction with the parking sensor system, which notifies the driver of obstacles with an audible warning to facilitate parking.

## Magnetorheologically controlled suspension

The SMC system offered for the Ferrari California T significantly reduces roll and makes the vehicle respond even more precisely, rapidly and effectively to driver input. The system uses the properties of magnetorheological fluids, which respond to varying magnetic fields by changing in viscosity, to tailor the damping effect precisely to the forces transmitted to the vehicle by the road. Ferrari Genuine offers owners the possibility of applying this semi-active suspension control technology to vehicle not originally equipped with the system.

## CD Reader

Customers may request an additional CD reader installed in the car. Installed within the dashboard glove compartment, the CD reader may be used to play audio and MP3 format CDs.

## CarPlay

To let owners use their iPhones in complete safety while at the wheel, Ferrari Genuine offers CarPlay, a system which makes the main functions of the iPhone (phone, music playback, send and receive messages, view maps etc.) accessible directly from the main display of the vehicle, letting the driver focus on driving. The CarPlay kit is offered together with the dual parking camera system, which adds cameras at the front and rear of the vehicle.

## AFS headlights

The AFS – Adaptive Frontlight System – headlights ensure maximum safety and performance even when driving at night by directing the light beam according to the steering angle and optimizing the intensity of the beam itself in relation to vehicle speed, even when driving around corners. The transition from diffused light illuminating nearby objects to a penetrating focused beam for long distance vision is smooth and seamless.

## Electro-chromic mirrors

The electrochromic mirrors effectively reduce reflected glare for the driver and passenger. This mirror uses special electrochromic technology to darken quickly and automatically in response to the brightness of the light striking it. Electrochromic versions are available for both the interior and exterior rear view mirrors, and does not affect the mirror position memory and powered folding mirror functions on vehicles with these features.

## Smoker's kit

The smoker's kit adds an ashtray and a cigarette lighter installed in the front center tunnel console. The components of the kit are specifically designed to complement the exclusive style of the interior of a Ferrari.

## Anti-stone chip protective film

To protect the bodywork from marks, chips and scratches caused by gravel picked up from the road, a kit may be ordered consisting of extremely tough and thin transparent protective films tailored specifically for the forms of the car. Films applied to particularly exposed areas such as the wheel arches and air intakes, and subject to greater wear, may also be ordered individually.

ALL MODELS

### Summer and winter tires

The solid, long-standing technological partnership between Pirelli, Michelin and Ferrari has led to the development of specific summer and winter tires, to be swapped at appropriate times of the year to maximize performance and durability.

Manufactured with rubber compounds with advanced grip properties, superior water expulsion capability and extreme structural stability even at higher speeds, Ferrari tires combine extraordinary traction with impeccable handling qualities. These tires

significantly reduce stopping distances for unparalleled safety and control in all weather conditions, including snow. Winter tires are available for all models as an individual set of tires alone, or as part of a complete kit including a set of standard wheels with Silver finish.

### Brake calipers

Ferrari Genuine has created a number of different kits for customers who want to customize their vehicles and change the color of the calipers by replacing them with parts available in a range of different colors: Gloss Black, Modena Yellow, Aluminum, Corsa Red and Scuderia Red, as well as other specific colors for each vehicle model. The anodized black calipers have been created specifically for Gentlemen Drivers and track use, as the anodizing treatment withstands high temperatures and keeps the paint finish in its original condition.

## Personalization options for unsprung masses

Ferrari offers a wide choice of solutions for personalizing the unsprung masses of each model, with a selection of styles and colors ranging from more traditional designs, with the classic Prancing Horse emblem, to items with a more contemporary and innovative look inspired by the latest technology. The hubcap set, the complete set of valve caps complete with valve body covers and the hexagonal valve cap set are offered in a choice of matchable colors and styles for use together.

The theft-proof wheel bolts may be personalized by fitting a cap replicating the appearance of a standard bolt, concealing the fact that the wheel is equipped with theft-proof components.

## Battery conditioner

Ferrari Genuine offers a battery conditioner for charging batteries from 1.2Ah to 140Ah. To protect it against overheating, the battery conditioner is equipped with a power limiting system: if the temperature exceeds the safety threshold value, power output is limited until the temperature returns within the correct range.

## Long-life battery

For situations where using the standard battery conditioner is not always feasible, Ferrari Genuine offers a new long-life battery, developed, tested and optimized for superior power, performance and durability. The Ferrari battery is made with plates in 99.99% pure lead. This purity means that the plates may be made thinner and more compact, reducing wasted space between cells and increasing the number of plates usable in the battery, which translates to more surface area and, as a result, more power.

## CarFit Leather Accessories

Ferrari Genuine offers a comprehensive range of leather accessories: with a computer case, tablet wallet, wheeled bag and key holder. The design of Ferrari leather accessories combines impeccable style with outstanding functionality, with compact

dimensions to optimize space usage within the vehicle: the computer case can carry laptops with screens up to 15", the wallet is compatible with today's most widely used tablets and the wheeled bag complies with the hand luggage

size limitations of all major airlines. All accessories feature exclusive, personalized graphics evocative of Prancing Horse emblem, while the computer case is inspired by the front lid of the Ferrari Enzo.

## Car Care

Developed and produced exclusively by Ferrari Genuine, the Exterior Cleaning Kit, Interior Cleaning Kit and Touring Cleaning Kit consist of a selection of products letting owners look after the interior and exterior of their cars completely and safely. Specific cleaning products to clean, nourish or polish every part of the interior trim and protect the quality of the materials used, personalized Ferrari fragrances with a unique and unmistakable scent, and superlative quality creams which are gentle on the skin and care for the environment: these are just some of the car care products available from the official Ferrari network, created to keep your Ferrari in immaculate condition and looking as good as ever day after day, whether in the city or on the road.

## Child seats

A new range of child restraint seats for every age. Developed in compliance with the most stringent safety standards, these child seats are contoured to match the shape of the rear seat for maximum support and ease of installation. Ferrari Genuine offers customers a choice of three different child seat formats to cater to children of all ages in complete comfort and safety, for the total peace of mind of parents.
